PROFILE

Senior Software Engineer with 4+ years of experience building scalable backend systems and reusable frameworks using **Node.js** and **ReactJS**. Proven expertise in connector platform development, API design, and automated testing, delivering up to 80% cost and development time reduction. Awarded the **Client and Partner Success Award – 2024** at IBM for impactful contributions to IBM Watson Orchestrate. Strong background in **system design, reliability engineering, and cross-team collaboration.**

EMPLOYMENT HISTORY

Jan 2024 – Present **Senior Software Engineer, IBM India Software Labs** Bengaluru, India

- Designed and implemented a **stream-based file upload framework solution** for multiple connectors, overcoming the earlier 10 MB buffering limitation by converting file payloads into streams. Supported bounded/unbounded endpoints and enabled a **claim-check pattern for large file transfers**, improving reliability and reducing memory usage.
- Designed and built an **internal Dev Sandbox** replicating the test environment with the latest production UI and backend code, enabling local end-to-end testing of connector and framework changes. Used **ReactJS and Node.js to develop** the framework, **reducing development and debugging time by ~85%.**
- Architected a **connector service framework** to integrate IBM App Connect connectors with IBM Watson Orchestrate, exposing connector capabilities as Open API 3.0 descriptors with organization-specific annotations, enabling workflow orchestration and driving **~80% cost reduction through reuse**.
- Designed and developed a **connector compliance and regression testing framework** integrated with Jenkins, automating CRUD validation across all connector objects. Mandated for onboarding, it reduced manual testing effort, human error, and improved system stability.

Jul 2021 – Dec 2023 **Software Engineer, IBM India Software Labs** Bengaluru, India

- Designed a **base JDBC framework for IBM App Connect** to standardize database connectivity, transaction management, and CRUD/custom SQL execution, significantly reducing connector development time by 80% and improving consistency across JDBC-based integrations.
- Extended connector query capabilities by implementing logical, comparison, and string-based operators, enabling flexible, user-defined database queries and enhancing integration efficiency.

Jan 2021 – Jun 2021 **Software Developer Intern, IBM India Software Labs** Bengaluru, India

- **Developed automated tests** for IBM App Connect releases using Codecept.JS. Enhanced UI features through ReactJS.
- Collaborated in Docker environments to streamline deployment processes across teams.

EDUCATION

Jul 2019 – Jun 2021 **MTech in CSE, International Institute of Information Technology Bangalore (IIIT Bangalore)** Bengaluru

- GPA: 3.33/4.0
- Coursework: Operating Systems, Data Structures, Analysis of Algorithms, System Design and Patterns, Machine Learning, Networking, Databases

SKILLS

- Programming Languages: C++ programming & debugging, JavaScript, Python, Chatbot development using IBM Watson
- Backend Technologies: Node.js, Express.js, REST APIs, Jest Testing, API Development
- Frontend Technologies: ReactJS, HTML, CSS
- Databases: MySQL, MongoDB, SQL, PostgreSQL, Oracle DB
- DevOps & Cloud: Docker, Kubernetes, OpenShift, Jenkins, CI/CD, Copilot, AWS distributed systems, Jira, GitHub
- Core Computer Science: Data Structures & Algorithms, Object-Oriented Programming, Scalable System Design, Testrail
- Soft Skills: Problem Solving, Ownership, Team Leadership, Cross-Team Collaboration, Decision making

HONORS & AWARDS

- Received the **Client and Partner Success Award - 2024** from IBM for my contribution towards the design and development of the connector service framework for IBM Watson Orchestrate.
- Secured **AIR-963** in Graduate Aptitude Test in Engineering (GATE).
- Received a **Chancellor's Scholarship-2017** from RGPV University, for my meritorious performance.
